Introduction:

Hi Paw is a pet adoption/rehome responsive website where you can offer your cat or dog for adoption, or browse pets to find your perfect companion.

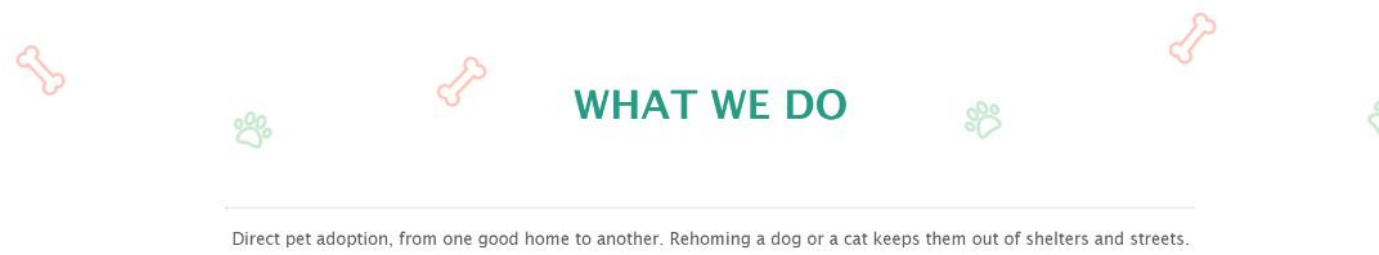

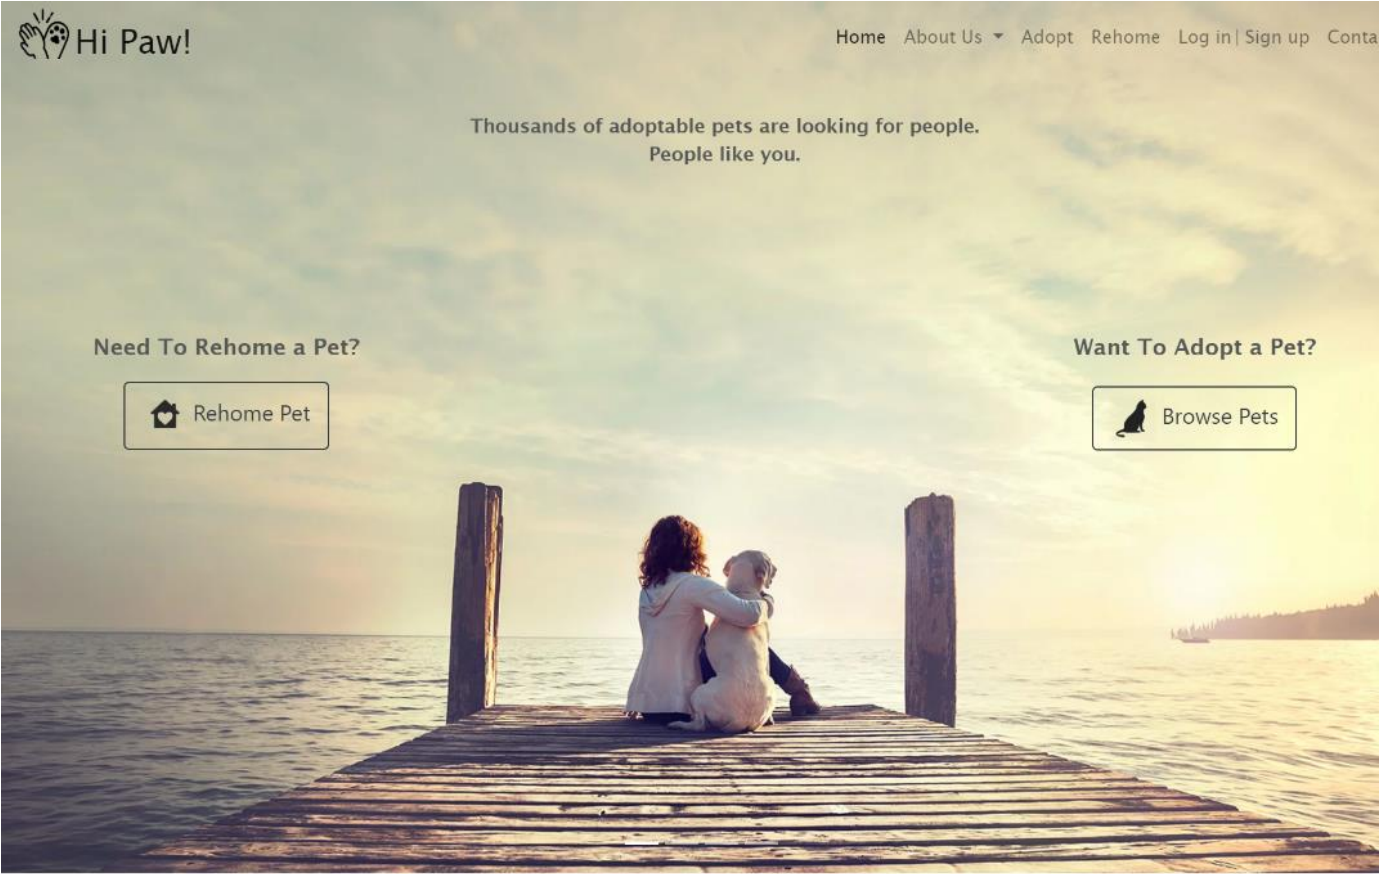

Here's how it works:

- Want to rehome your pet? Sign up as a guardian, create a profile for your pet which contains its image, type, gender, size, age, fur color, health, favorite food, what it likes, enjoys and good with.
- Adopters can search for pets by their location, type, gender, age, and fur color. After browsing pets' profiles, they can save what they are interested in to view later. Or just start the adoption process by filling a form containing their info which will be sent to the guardian.
- The guardian can preview his pets' adoption requests, chat with the prospective new guardians online on our website to help him decide either to accept the request or delete it.

Libraries and open source tools:

- Bootstrap 4 :
To make our website responsive
- jQuery :
we used it for most of our JavaScript functions and code
- AJAX :
We mainly used it for sending and receiving data from the server without reuploading the whole page, just a specific part. (e.g. for chat)
- AOS animation :
To add animation and liveliness to our websites
- Font awesome icons

Home page:

Adopters
meet and learn about pets from the Guardians (owners) who know them best.

Guardians
keep their pets out of the shelter. By rehoming a dog or cat, they can find them loving, new homes.

Local Veterinarians
examine pets at no extra charge as a part of the pet adoption.

Pets
go directly from one loving home to another. Pet adoption with less stress. Less chance of illness or death.

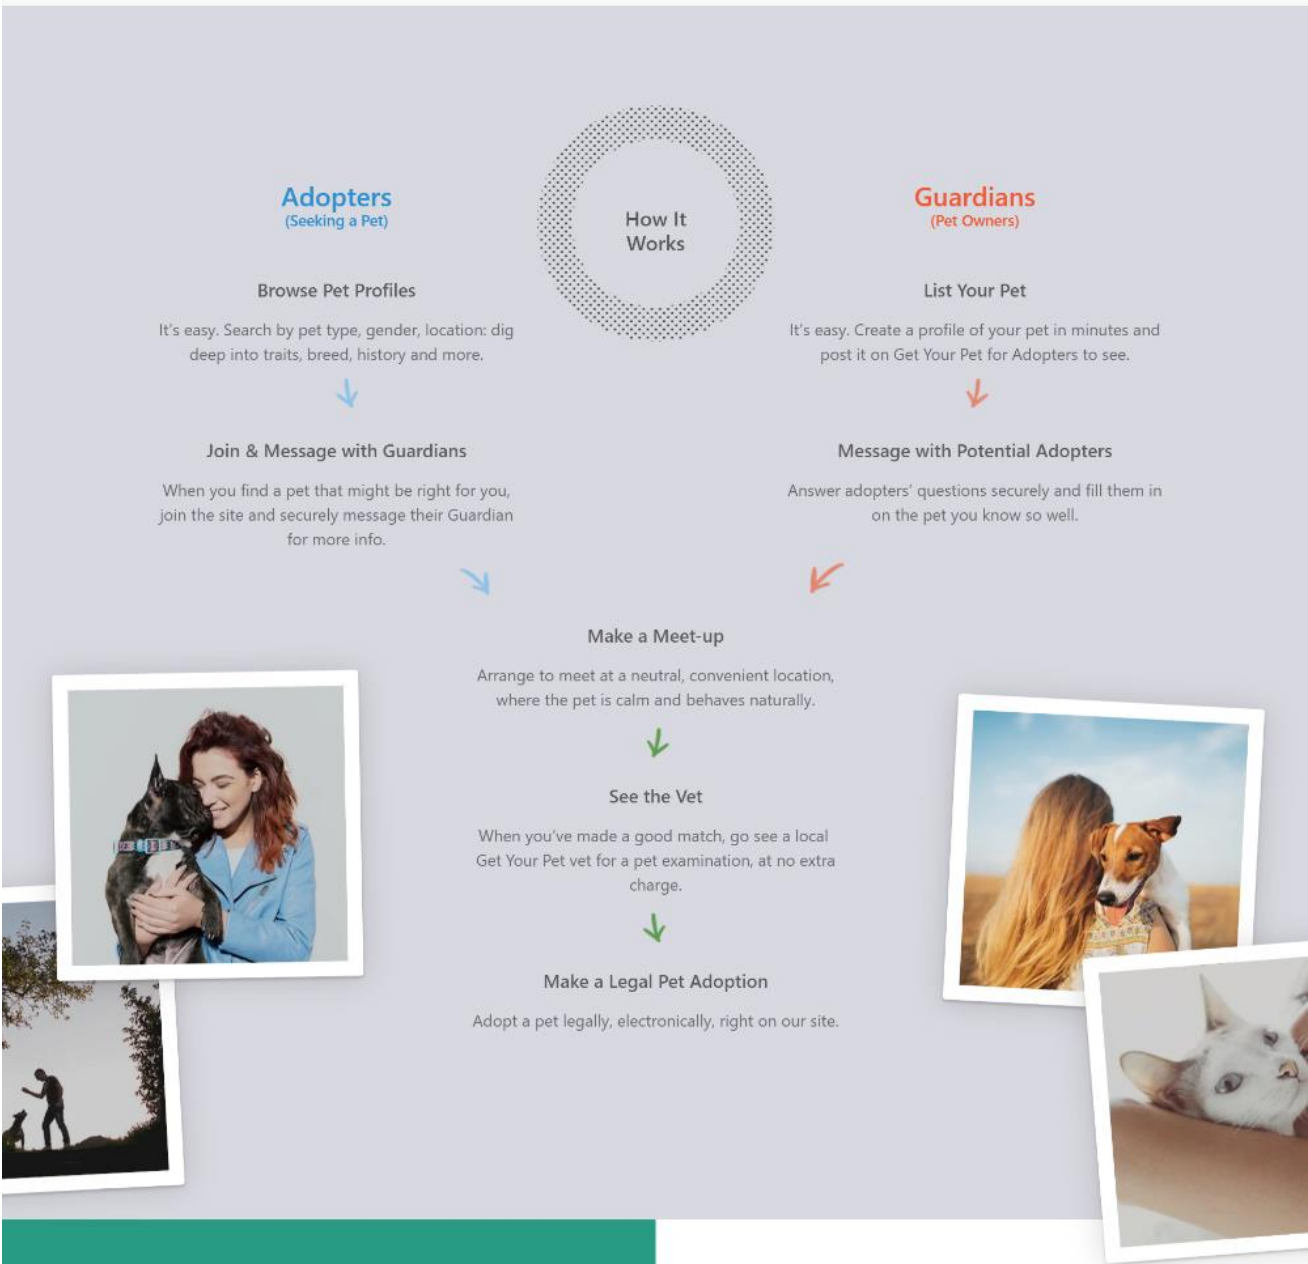

WHAT PEOPLE ARE SAYING...

“ Beautiful ❤️❤️

Story

Simon is a sweetheart. He is a healthy, strong, growing male kitten. He is 5 months old. He is extremely cuddly and likes to nuzzle into you whenever you'll let him. He has a lot of energy, as all kittens do, and a hearty appetite. Sometimes I think he acts like a puppy because he loves affection
